Intrenergy 's CEO Presents at COVES 2008

RICHMOND, VA, USA – September 18, 2008 – John Keppler, President and CEO of Intrenergy, a U.S.-based renewable energy company, was a guest speaker at the 2008 Commonwealth of Virginia Energy and Sustainability Conference (COVES) hosted in Richmond, Virginia. Mr. Keppler, a graduate of the University of Virginia's Darden School of Business, delivered a presentation entitled "Financing Industrial Biomass Projects." Keppler spoke as part of the conference's *Financing a Low Carbon Future* series of breakout sessions. In his presentation, Keppler described the various capital structures commonly used to finance energy projects such as those developed by Intrenergy and the implications of the current financial market conditions for developing such projects.

About Intrenergy

Founded in 2004, Intrenergy specializes in building, financing, owning, and operating renewable energy facilities. Intrenergy converts cost-competitive biomass into green electricity and thermal energy (steam) for industrial customers, helping to reduce their exposure to fossil fuel price volatility and carbon emissions. Today, Intrenergy operates facilities in Mississippi, Ohio, Germany, and the Dominican Republic; new facilities now in permitting and construction include projects located in Belgium, Connecticut, Delaware, and Pennsylvania. Collectively, these projects represent over \$250 million in capital investment. For more information, visit www.Intrenergy.com.
